

ELEVATED EMBROIDERY FOR THE DIGITAL AGE

AccuLineX

Integrate even more options for decoration into your shop with the GTXpro series and GTX600 series printers enabled with direct to embroidery capabilities. AccuLine X aligns embroidery with the rest of the design's print file, utilizing a high resolution camera for highly precise application of the design.

ACCULINE X FEATURES:

- Compatibility with the GTXpro series and GTX600 series printers
- Functions independently of embroidery machines, no matter the model
- Print high-quality, full-color detailed designs on top of white thread
- User-friendly software

**SEE IT IN
ACTION!**

ABOUT THE DTE PROCESS:

Stitch the embroidery design in white thread and pretreat fabric

Use the software to align the embroidery with print file

Load the print file on the GTXpro series & print

Cure the digital print with a conveyor dryer

ACCULINE X SOFTWARE

AccuLine X is easy to use and only requires a simple calibration before printing. Using your embroidery design file, create templates within the software and select from preset print settings before you begin. Once ready to print, the camera automatically recognizes the embroidery design and aligns the artwork design for accurate printing.
