DTF LASER CUTTER

The Brother DTF Laser Cutter redefines the way you finish transfers – bringing intelligence, precision, and efficiency into your workflow. By etching barcodes directly into the film and cutting transfers with key information, this powerful machine delivers faster sorting, easier tracking, and a cleaner press than traditional knife cutters.

Reduce wasted ink and excess powder while eliminating the need to trim barcodes. Streamline your DTF workflow and print more orders with confidence!

Features:

- **Laser-Etched Barcodes** – applied to DTF film for simple sorting and accurate workflow tracking.
- **Reduced Ink and Powder** – Unlike printed barcodes, etched codes don't use extra supplies.
- **Non-Transferrable Codes** – Barcodes stay on the film, never transferring to the garment or requiring trimming.
- **Precision Cutting Options** – Cut individual designs or use perf cuts to keep multiple designs grouped under a single barcode.
- **Streamlined Workflow** – Barcode scanning ensures transfers are matched to garments to help reduce errors.
- **Finish Faster** – Spend less time trimming and sorting, and more time pressing and shipping.

The Brother DTF Laser Cutter simplifies every step – Cut. Match. Press – so you can work faster, minimize mistakes, and keep production moving.
