Entry Level Production

If you are new to the garment decoration business, or if you are simply looking to add capabilities to help keep more work and more profit in-house, a production package with single-unit capacity is a great entry point for you. With only a minimal amount of floor space you can create a production environment similar to traditional garment printing but with the added ability to print one-offs and take any type of digital art files.

EQUIPMENT	1 GTX-422/3 + Heat Press + SH	1 GTX-422/3 + 1 GTXpro B + SH + Dryer

Medium Volume Shops

The two-lane Synergy+Firely production line is ideal for any existing garment decorator looking to expand their product offering with higher-volume, high-color printing for one off and bulk orders. This multi-printer setup with high volume pretreat system immediately provides production redundancies to keep your operation moving at full speed with a configuration that is designed to grow along with your business.

This easy-to-use system also gives screen printers and existing DTG print shops an opportunity to be more competitive in their markets while minimizing their capital investment. The ability to save profiles makes reprints and expanded orders a snap.

2-Lane Synergy+Firefly

High Volume Production POD

Take your business to places you never thought possible with a three-lane Synergy+Firefly production system. Fulfill any size order with industrial speeds and amazing print quality that customers now expect and demand. Stay on schedule with production lane redundancy that minimizes downtime and keeps massive orders moving. Grow intelligently and cost effectively by adding new pods and lanes as your business requires it.

GTXpro B Printers
3-Lane Synergy+Firefly

Max Capacity Single POD

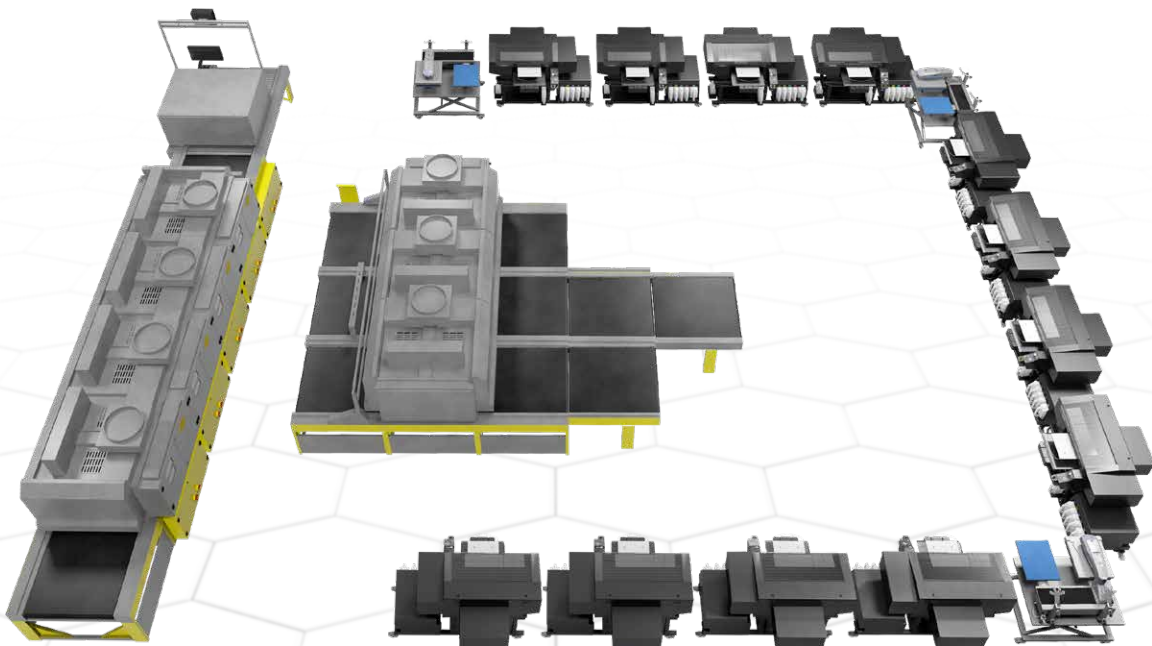

Any high-volume garment decorator looking for greater production efficiencies and higher quality printing should consider a multiple production line set up. It's an established system that is replicated and repeatable to enable controlled growth and can accommodate up to 12 GTXpro B printing units with up to 480 printed pieces each hour of operation.

If you're in the market for three or more GTXpro B units, a Synergy and Firefly setup can provide the type of low cost and higher gains that will make a real difference to your bottom line.

MASS PRODUCTION WITH BROTHER GTXpro

- Complete flexibility
- Easy maintenance
- Sharp print quality
